3. The immediate locality contains already a number of large and medium sized illuminated advertisements with which the change from non-illuminated to illuminated advertisement would blend in easily and would not cause any material harm to the amenity of the area.
4. For technical reasons I have chosen to make this application on a hard paper copy of the application form. However, I would prefer where possible to be contacted electronically at peter@qbajjar.com on any matters arising from the application.
5. Any telephone communications would be easier on my mobile at 07774 223059.
6. I look forward to hearing from you.

Thank you.
