17 May 2014

Many thanks for coming by the other day, and for getting the revised plans - and report - relating to the ground-floor flat at no 10 Evangelist Road - sent to me. I am very grateful.

I also wanted to let you know that this Saturday the building work at no 8 - next door, has again continued into the afternoon. The workmen claim there is nothing to say that they have to stop work at 1.00 pm, only that it should not be noisy. Even so, they continue hammering, banging, drilling and sawing. There appear to be at least 4/5 workmen on site - inside, in the garden, and on the roof, whilst on the other side work continues on the top terrace at no 12.

If there is anything you can do to persuade them to stop work by 1.00 pm, I would be very grateful.
