Dear Camden Planning Department

Application 2013/8002/P: 2A Conway Street

I am writing in connection with the above planning application.

I wish to support the proposal that has been submitted to the Council for planning permission for a roof extension and change of use of the top floor of this building to residential use.

The gallery has played an important role in improving the environment in this part of the Conservation Area and also makes a significant contribution to the community. The new residential accommodation is not detrimental to the continued gallery use of the building and the roof extension is of a high design quality. I therefore support the application.

Yours faithfully

Dear Ms Litherland

In response to the consultation letter that I received from the Council to the planning application that has been recently submitted for 2A Conway Street, I have the following comments.

I have no objection to the change of use of the second floor to a residential use and welcome more residential accommodation in the local area and in Conway Street. The Council needs more housing and small schemes like this are to be commended.

Whilst the roof extension is of a modern design I do feel that it is appropriate to the building and will have a positive impact on the streetscape especially in the context of the BT Tower to the south which dominates in most views. I am particularly impressed with the high quality design of the roof extension and the steps that have been taken to design a roof extension that is sensitive to the location.

I support this application.

Yours sincerely
