I support the application (please state reasons below) I object to the application (please state reasons below) 

Your comments

I write now to say that I have already written several times to object to previous applications which proposed to turn the upper floor, and outside balcony, of this pub into flats.

I write, again, to object strongly to this destructive proposal.

You have a record, I understand of the objections I have given to you previously; and I understand that you are able to present all these previous objections, now, to oppose this latest application. Thank you for doing this.
