Dear Hanna Parker

I am writing to you to object to planning applications amendment Ref: 2014/0831/P (Associated Ref 2011/1821/P).

I object to the raising of the height of this historically controversial development. It would make it appear even more inappropriate to the existing streetscape from along Goodge Street and the Tottenham Court Road.

I draw your attention to proposed drawings (3349915?) relating to Goodge Street.

The drawing on page 7/18 (7 Goodge Street revised) refers at point 3 (in small print above the building) to "9 Goodge Street chimney extended"

Number 9 is not the developer's property. It has not been subject to any planning application by the owners and can form no part of this amendment application.

I would also object to the proposed treatment of waste. The storing of mixed recycling, which would include empty food tins, being left to build up in five wheelie bins or boxes on shelves can only attract vermin to the building and others nearby; as would leaving them out on the streets.

It appears that the building is to be managed so waste could be cleared by them on a daily basis
