

Dear Gavin Sexton.

I have found out by word of mouth that 107 West End Lane have put in planning applications for a large basement excavation.

This situation has gone on for years - they have enclosed the whole area in a wooden structure so if any-one, including a council inspector, can see nothing of what they are doing.

They also managed to burn down the front, burning cables for telephone + computers which were out for

2 wks. The said cables are on their land + only have temporary covering - this is B.T.S fault.

All the reasons given in the past against this construction still stand. Small terrace houses, dangerous road, bus stop. The house backing onto this property in Messina Avenue has had bad subsidence. The house 2 along on the other side has had bad subsidence.

I do not understand why we were not notified of another planning application, especially as it is even bigger than before. The information I was given to make comments on the web came to nothing. You can see by the way 105 is boarded up they are going to do what they want.
