**Categories:** Orange Category

1. The proposed development will have prejudicial effect on our infrastructure.
2. The traffic in our area is already at capacity. This proposed building will cause even greater congestion.
3. Parking in the area is already virtually saturated. These new units will create extreme problems.
4. The building works will cause an enormous destruction to this residential area.
- 5 an 80 m building over the community areas will destroy the advantages that we have recently enjoyed.
6. The proposal is of no benefit to the community. The only benefit will be to the developers
