**Subject:** Proposed removal of tree at 12 Downside Crescent  
**Categories:** Green Category

Your ref: 2014/2343/T

I am responding to your letter of 2 April.

The small conifer tree outside 12 Downside Crescent may have a Goldcrest's nest in it. This should be checked by a Council Environmental Officer. If there is a nest, eggs are normally laid in April and so the removal of the tree should be delayed until July by when the young should have fledged.

Subject to this, I have no objection to the proposed removal.

John Osmond  
7 Downside Crescent
