Your comments

In 1992, due to Subsidence, extensive repair work was carried out to the gable wall of 75 Constantine Road at third floor level which is above the roofline of 73 Constantine Road. The proposed development at 73 Constantine has the ability to either disturb the previous work, or create additional problems due to the excavation works. Whilst in principle we have no objection to the proposed works, the applicant should be aware of the previous problems encountered with the Gable end, and accept that any future problem arising as a result of their work should be remedied and paid for by them.
