There is absolutely no sound proofing in the building. Previous building works were noisy & at anti-social hours, and noise levels were unacceptable. Whole building could hear it.

Building already has serious structural flaws structural problems with mould and damp. Bottom floor flats have problems with water coming through ceiling. Having extra weight will not help this.

There is already a lack of parking space and no room for more cars.

There is no functional lift for disabled access.

Courtyard is already very dark and building does not need any extra height. There is already a lack of natural light.
