Re: Objection to Planning Permission – Fifth Floor, 45 New Compton St. Camden Council Ref: 2014/0150/P

Dear Mr Miller,

I wish to object to this development for the following reasons,

I live in Flat 10 Pendrell House, there have been a number of high rise buildings recently built in the Denmark Street area. which has caused loss of light to my flat.

The proposed new development will affect my kitchen area which has already suffered from loss of light at present I have to have the lights in order to have brightness in my kitchen and cannot use a blind as it would be far too dark. The building in directly above my kitchen. It will also affect the window and light in the hallway.

The loss of privacy and being overlooked is a real problem as drawing blinds makes it far too dark even in daylight if this goes ahead my flat will surrounded on all sides. In spring and summer the trees have leaves and this in addition blocks out even more light .

At least the trees lose there leaves in the autumn and winter and I can look forward to a bit more light . With the new development I would have no respite.

This is the first time I have written to oppose a planning proposal and strongly feel local people should have a quality of life.

Valerie Valero
