Categories: Orange Category

I should like to object to the above PA 2013/7758/P for a retrospective application for an air-conditioning unit on the roof of 7 Akenside Road – only some 8’ above the ground.

At outset, I should like to apologise for the delay in submitting this objection. Your records will indicate that I notified Camden of the erection of this unit, and that I did not believe planning approval had been sought. In the circumstances I believe that Camden should have advised me of this retrospective application. I was not so advised.

I have submitted photographic evidence to you of the location of this unit. It is +/- 15 metres from my home. Hence it is visually offensive to me, as well as all my neighbours at 13 Wedderburn Road. The unit could well have been located in a different position that would not have been so visually intrusive.

The unit belches out a constant stream of smoke/steam. I have no idea what causes this, but I wish to complain that it is an environmental hazard. Additionally it is noisy. Finally, we all live in a Conservation Area, and surely that provides some protection.

I therefore urge you to reject this retrospective application.
