

26 Willingham Close

Leighton Road

London NW5 2UY

6th February 2014

Planning Objection to Planning Application Number 2013/7338/P

I write as a resident of Willingham Close which overlooks the proposed development.

Despite the application being revised I still have serious concerns over what the developer wants to build.

I consider the block to be out of keeping with the site as 3 sides are Victorian Terraces and the other a early 1950's Council Estate.

I consider the revised plans to be still too bulky , also too high for the proposed site. I also feel that the size of the 18 flats are to small in size and would only be suitable for either single people or families with no children.

I consider the revised plans to still be a overdevelopment of the site. If approved the residents of Leighton Grove would have a three story development less than a metre from their the rear of their small rear gardens.

I also concerned at the loss of privacy for all residents who will be overlooked by this proposed development.

In the view of the serious ness of this proposed development I request that this application is determined by the Development Control Committee I would also like to be present when the application is heard and would also like to be able to speak against this applications.

Your Sincerley
