RE: PLANNING APPLICATION: 2013/7894/P, 9-13 Grape Street, London, WC2

Dear Sirs,

We write in connection with the above planning applications. We object to the proposed plans on the following grounds:

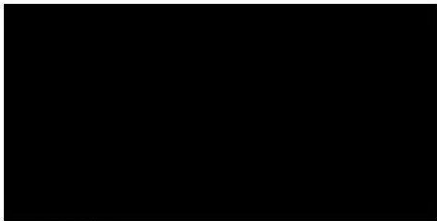

We are the occupier / company directly next door to 9-13 Grape Street and we are concerned with the interruption this planning application may have on our business.

We are an event meeting company and film studio employing 25 staff. We also occupy another building around the corner. We have film shoots and event meetings taking place in Grape Street each day.

Our main concern is to the noise involved in the planning application that may well affect our business. We are also concerned to the look of scaffolding and lorries outside our offices. The road is very narrow and there is no way for passing traffic.

Should there be unsightly scaffolding and noise this could mean loss to our business as our clients come to us to promote their brands and invite their clients to meetings at our studios as well as live filming broadcasting.

We understand this is over 1 year to complete and we would be extremely concerned as it could result in us unable to trade and loss of jobs.
