2014/4777/P	Paul Watkins	23 Jeffreys Street London NW1 9PS	30/09/2014 15:44:07	COMMNT	I fully endorse Mr John Green's objections currently submitted to you. The scheme presents a development that is completely out of character with the rest of the street, with its early 19th-century listed terraces. I trust that these proposals will be rejected by the planning committee.
2014/4777/P	Philip Kemp	20 Jeffreys Street London NW1 9PR	30/09/2014 23:37:51	COMMEM AIL	<p>The current row of garages is an eyesore, and would be no loss. However, whatever replaces them should enhance the look of the street, not detract from it. This proposal would replace bad with worse.</p> <p>The proposed buildings are too high and in an architectural style alien to the rest of the street. The pointed gables have no counterpart elsewhere in Jeffreys Street. Furthermore the structures as proposed would protrude beyond the building line of the rest of the south side of the street. The single-storey lean-to add-on to no 174 Camden Street should not be taken as a guide.</p> <p>In any case, the failure of the developer to purchase garage #4 makes a nonsense of the whole scheme. It should be rejected.</p>
