2014/5112/P	Kafouris	6 Laystall street London EC1R 4PA	18/09/2014 02:19:12	OBJNOT	<p>We have been living at 6 Laystall next door for over 60 yrs. We Object to the application due to loss of daylight, sunlight, privacy, less ventilation. Infiles and new terrace will be next to our bedroom kitchen toilet stairwell and above our bathroom which has see thru glass skylights, so number8 will overlook into our bath! We have had years of neighbour developments being granted such as at nos. 10 with extra partywall height and extra floor and terrace; opposite at Vine Hill a huge extra storey and huge roof on office, other Vine Hill place built opposite our kitchen, bedroom windows. All these invaded our privacy and diminished our ventilation, daylight, sunlight, now restricted to small triangle at top of our windows! Objection also to noise nuisance of works and dirt dust debris falling onto our side and into our yard, which happened before. builders will be intrusive and able to see into our home and bath bang next door, no privacy. We have enjoyed privacy and quiet over 60 yrs here. The rear of no.8 is at acute angle to us so the works and completion will be intrusive and overlook onto and into our home bath bedroom toilet and stairwell. Infiles and terrace will bring no.8 into view of our home and into our windows, where now they are not. The owner of no.8 knew what he was buying and aware of size of it, so why should we suffer after 60 yrs here, so he can make more profit by letting it out for more? as it is up for to Let all the time. Or even if it"s for him. Please think of us who have a right to our daylight sunlight privacy, quiet. We have outside toilet too so it will overlook that too making its use awkward. Also it will overlook our yard which we enjoy for privacy and plants and overlooking will invade this as well as dirt dust falling onto our plants and yard. There will be less ventilation by being hemmed in as well as a feeling of claustrophobia surrounded too closely by these infiles and terrace! We need quiet enjoyment of our home. Infiles and new terrace also will run right next to our stairwells and will hugely cut down our current daylight and sunlight of all our stairs and also privacy. We have little enough daylight as it is on our stairs without all this development which will adversely impact upon us. New Rear windows of no.8 will overlook and be seeing into our home and stairs. We don"t want our privacy invaded and our daylight diminished as we have our rear windows running up our stairwell up to our top floor, these windows will all be hemmed in, darkened by infiles. Please see that this development will be bad for us and result in loss of our day- and sunlight, privacy ventilation around us and quiet, hemming in. New terrace"s use will bring noise into our top floor bedroom which currently has nothing on north right side. We right to be able to sleep quietly. Talking chatter and music from new terrace especially in summers will be awful for us right next to our bedroom. Also no.8 tenants,resident will be able to get onto our roof.</p> <p>Front elevation alterations will alter character of street by their manner of design, appearance,layout and materials. More vehicles if more people at no. 8 will reduce parking for other current residents and us and increase traffic. Please understand our situation and that this development if it goes ahead will badly affect as and make our lives worse and miserable after 60 years here to have this thrust upon us. Thank you for your kind consideration. We would like to attend any committee and to speak.</p>
2014/5112/P	Mrs A Bonomi	162 Clerkenwell Road London EC1	18/09/2014 14:02:44	OBJ	<p>We object because of interference to our light, ventilation and privacy. We live next door and our rear is very near to the proposed alterations. It will affect us worse. It will reduce our light, sunlight and daylight and is not fair on us. The building noise and all the dirt will be disrupting. We will have less privacy being overseen by the alterations at the rear towards our rear. We will have less ventilation with higher building up. We object to the application. We have lived here a lifetime.</p>

2014/5112/P	Mr Vittorio	164 Clerkenwell Rd London EC1	18/09/2014 15:46:52	OBJ	Objection to this proposal. All the new alterations will directly overlook over and into the skylight on our rear ground floor patio flat roof and will also overlook into rear windows of our building resulting in loss of privacy loss of sunlight and daylight. Resulting building works noise and associated dirt etc will be a big nuisance. Our rear is already closed in by surrounding buildings so this proposal will further reduce ventilation around us.
