2014/4506/P	Lucy Devlin	18C Cleveland Street W1T 4HZ	15/09/2014 11:32:57	COMMNT	Whilst I am happy for the change of use to be residential, I have some concern that the excavation work for the new vaults will cause noise and disruption to the surrounding properties, which have already had to suffer from two years of disruption from the building on the Middlesex hospital site, as well as the roadworks on Cleveland Street itself. The houses from 16-20 are from around ~1790 (and Grade II listed) and may not be as stable as the other more modern buildings on the street, and this should be kept in mind when assessing the application. Any permitted development should only be allowed provided it does not damage the surrounding buildings and minimises noise, vibrations, and traffic disruptions to neighbours.
