Your comments

- 1) Concern about proposed height of building (as if height will surround building). Effects of loss of light and over-look on adjacent buildings; poor provision for services and no refuse collection.
- 2) Major concerns about disruption to neighboring locations (noise and dust during demolition and construction, long permitted working hours); access to site, parking of lorries and plants, potential road closures; reduced facilities for cycle/yellow line parking, after restricted hours.
- 3) Impact on access to public transport with influx of large number of residents without parking permits.
- 4) Concern because of close proximity to sites which will also cause major and lengthy disruption if HS2 project goes ahead (skinning and original bridge at London Road, Randolph Road and Queens Road) with road closures, heavy traffic etc.
- 5) I work from home and the proposed developments deter me from remaining in this area. The proposals will have a severe effect on the saleability of my property - nobody will want to buy a property in the vicinity of major and lengthy building developments.
