I object to the application (please state reasons below)

Your comments

I don't object in principle to building on the front of the reservoir as it will not impact so much on the wildlife, & would provide affordable housing which is what we need in the area

Culture & Environment

- Threat to protected "wild life."
- Yet one more area of natural, open land given over to 'development' (for the better-off, natürlich)
- More Traffic, noise, etc. etc. etc. ...
- 'They' will continue filling in green spaces till there ain't no more.

Thank God I'm old & won't see the final demise of this poor old planet, That's all, folks!
