I am writing to oppose the planning application 2013/6674/P

I object for the following reasons:

- 1) On the architect's plan the building which is nearest the Heath is designed as a combination of two and three storeys. If the structure was reduced to two storeys only it would feel less overpowering and dominant and it would also allow the skyline of trees behind to be visible which helps to give the area a green and open aspect.
- 2) The light coloured rendering which is proposed is quite impractical and will very quickly become an ideal surface for graffiti. It would be preferable if the lower part of the building was in brick which in fact would be much more in keeping with the local area.
- 3) Has the developer given any thought to how the current shops which are very popular with the local community will manage during the demolition and construction period?
