Your comments

A Basement will require deep digging - surely this will disturb the foundations of the trees and they could fall & cause much damage. Also, the foundations of the garages.

Three storeys will block the light from the apartments overlooking the house.

How is access to the house to be used?

I understand that it will take approx. 3 years to complete. How can this work be sustained? Has the council made us any to attain the underground situation regarding water, drains etc?

I always under stood that Bakhill Park was a Conservation Area. If so, how is the being overcome? A Modern monstrosity will look completely out of place. PLEASE DO NOT ALLOW this beautiful area be spoiled.

Please continue on extra sheets if you wish
