

I have searched on your website by the reference above and by address and cannot find the "TPO ref c6 " application to fell 2 trees

because I have no search results I cannot see what trees they are applying to cut down
but if there is a tree preservation order why would they be allowed given

there is such an order
this is a conservation area
they are adjacent to the Heath
this is metropolitan open land or
some very similar designation
when they applied for planning permission they were given very specific permission to
remove very specific trees

please send me details of which trees the application relates to

I object vehemently to the removal of trees on a road such as this which are subject
to a TPO
