Dear Sir

Re Proposed Planning Application 2013/6162/P

- 1.Excessive development of a terraced house only one room wide to make two three bedroomed maisonettes.This increases the density of occupation with the subsequent over loading of the utility services.
- 2 .Intrusion on the light to the adjacent home and seriously affect the peace of the attached terrace house in a conservation area.
- 3.The excavation of the basement will cause serious disturbance to neighbours and may well disrupt underground water-courses flowing down the hillside under this area.
- 4.This site,originally a small terrace of low built houses with garages has already been affected by some unsightly conversion and it would be a good thing to stop further degradation of the area.
