Dear Camden

I would like to raise strong objections to the development of the whole site around 6 Erskine rd from commercial to residential. In particular I would like to express my concern that the important community resource of Triyoga primrose hill may be lost. This yoga centre provides an important service to the local community including through its community classes and the services it provides including teacher training as well as osteopathy etc as well as its general yoga and other classes schedule. it's also important to the vibrancy and economic development of the neighbourhood that commercial enterprises and small businesses such as those which inhabit this complex are not lost to expensive housing that will likely be largely out of reach in price to many of those that use Triyoga and which will benefit fewer people. The building that Triyoga is in and the whole complex is also of interest from an historical perspective particularly the main studio in Triyoga.

As such it is important for the area that this site remain with its current usage.
