## Assessment

### 1.0 Background

1.1 Advertisement consent is sought for the display of 2 x external signs, and the display of an internal Multi-screen video wall.

1.2 Display of 1 x internally illuminated fascia sign - The proposed sign would be internally illuminated, and would be displayed approximately 2.1m from ground to base, project approximately 0.1m from the face of the building, the proposed lettering would be a maximum of 0.05m and have a dimension of 0.5m (height) x 1.6m (width) x 0.06m (depth). The proposed sign would be constructed using Aluminium letters with Opal Acrylic back halo from internal LEDs. It's unsure as to what the illumination levels are as the detail is not listed on the application form.

1.3 Display of 1 x non illuminated hanging sign - The 2<sup>nd</sup> sign would be a hanging sign would be non-illuminated the sign would be approximately 0.4m (height) x 0.6m (width) x 0.08m (depth). The proposed sign would be 2.1m from ground to base and would project approximately, 0.6m from the face of the building. The proposed sign would have individual letters with a maximum height of 0.12m on a white text on black background and constructed using black diabond.

1.4 The proposed multi-coloured screen video wall would be internal, set behind the shopfront and would benefiting from deemed consent as well as, graphic vinyl applied from inside, and as such, the proposed internal works did not form a part of the assessment for the proposed works associated with the 2 x external advertisement consents.

1.5 The Town and Country Planning (Control of Advertisements) Regulations 2007 permits the Council to only consider amenity and public safety matters in determining advertisement consent applications. The Council also has to take account of the impact of the signage in conservation areas. The Seven Dials Conservation Area Statement stipulates that "Internally illuminated box signs are unacceptable and generally signage should be non-illuminated or externally".

1.6 It is not considered that the signs would be unduly obtrusive in the street scene or disturb residents or occupiers. There are a number of similar advertisements along Neal Street for fascia and projecting signs with illumination which have been recently approved. The proposed signage will be 'halo illuminated' so as to reduce the impact of the advertisement on the conservation area.

### 2.0 Visual Amenity

2.1 It is considered that the signs would not be unduly obtrusive to the townscape nor result in visual clutter within the Seven Dials Conservation area. The proposed signage would not result in the disturbance of residents or occupiers. Therefore the signs would be acceptable and would comply with planning policies DP 26 and CS14 of the LDF.

### 3.0 Recommendation:

3.1 The proposed adverts are in general compliance with policies CS14, and DP24 of the Local Development Framework the application is therefore recommended for approval.
