

---

To the intention of Aysegul Olcar-Chamberlin

Dear Aysegul,

I am writing to express my concern regarding the above planning application

Here are my 3 main objections:

- I believe the wood structure of the building isn't strong enough to support an additional floor, there are already signs of small crack above my window. The freeholder and architects are the same who build that extension in the first place and they didn't do that extra floor for that reason (among others).
- there is no plan or drawing on that application and I would want to make sure there is no impact on my privacy. Right now, there is nothing looking over my small terrace and I don't want this to change
- lastly, I would be worried of the sound isolation as I could get noisy to have people living right above me.

Please let me know if you have any question.
