Dear Jason Traves,

With reference to the above application :

- (1) I do not think that this proposal is in keeping with other structures in our Conservation Area. By having motorised aluminium windows, it is also setting a precedent that could be incorporated into other local buildings.
- (2) I have had loss of utility of use of my back garden for the majority of this summer due to noise, vibration, dust, etc. Any amendments to the original plan will surely extend the construction period into next year? Why were religious festivals not taken into account when the original plans were submitted?

Yours sincerely,

[REDACTED]
