Subject: Planning application

Dear Mr Watts,

Thank you for coming this morning to view the site for the proposed installation of 3 air conditioning units at 59 Mill Lane NW6 1NB

The application reference is: 2014/5179/P

I am the owner of the flat next door at 57a Mill Lane. I strongly object to the installation of the air conditioning units because my bedroom window would be next to it. The noise pollution, and the extracted air would come in to my bedroom. And it would look very bad.

I suffer from asthma, and the last thing I need is to have bad air blown into my property. As for the noise, the suggestion to "close the window" or "put air conditioning yourself" given to me by the owner of the pharmacy next door is totally unrealistic to put it mildly. I bought this property a few months ago because of the quietness of the main bedroom. The nature of my work (pianist) involves finishing work late at night, and during the day I need to sleep with the window opened and no noise...

Hopefully you will put a stop to this application.

As a resident in Camden, I feel entitled to be protected by Camden Council from any devices that would cause considerable damage and unnecessary stress.

Kind regards,
Maria Garzon.
