Subject: 2014/5096/T Wellside, Well Walk

Dear Sir/Madam,

It is impossible for me to make an informed objection to this Notice of Intent since it was registered on 8.8.14. Comments are until 3 days *earlier* - so one can presume this means 5.9.14 not 5.8.14, and no papers have been placed on the website.

However this tree has already been refused for work to be done on it, and I ask you to refuse this again, whatever the work is to be or the reason given.

People living on the spring line that is Well Walk with streams running across it and wells dotted all over it are used to cracks and building settlement and to the lombardy poplars that were planted to keep their gardens less waterlogged and to balance the situation. As well as their practical use, the beauty of these trees has been given to us by those from several generations ago with the foresight to do this, and we must not undermine this with unnecessary tree work.

Please refuse again, and please place the papers on the planning website.
