

Dear Rav

Re: Application 2014/5113/P

I received a copy of the Planning Application for the Rear dormer extension with Juliette balcony at 32 Sherriff Road on the 22nd August. Having spoken with Patrick Flannery, the owner of 30B Sherriff Road (who lives above me) we had a look at the proposed extension. As can be seen from the attached photo the work is almost complete, including TV aerial. Little point in sending a Planning Application Consultation notice! Patrick Flannery is going to contact her since this extension and balcony will overlook his roof terrace, which is out of order especially as no consultation was carried out before the work was completed.

I have tried responding to Tessa Craig at the Regeneration and Planning Development Management Department online, but could not get the website to accept the application number, would you therefore kindly forward the photo and comments to her if possible?

With kind regards

the 1990s, the number of people with a university degree has increased in all countries, but the increase has been most dramatic in the Netherlands.

As a result of the increase in the number of people with a university degree, the average educational level of the population has risen. The average educational level is defined as the average number of years of schooling completed by the population. The average educational level of the population has risen in all countries, but the increase has been most dramatic in the Netherlands.

The increase in the average educational level of the population has led to a decrease in the number of people with a low educational level.

The decrease in the number of people with a low educational level has led to a decrease in the number of people with a low income.

The decrease in the number of people with a low income has led to a decrease in the number of people with a low standard of living.

The decrease in the number of people with a low standard of living has led to a decrease in the number of people with a low quality of life.

The decrease in the number of people with a low quality of life has led to a decrease in the number of people with a low life expectancy.

The decrease in the number of people with a low life expectancy has led to a decrease in the number of people with a low health status.

The decrease in the number of people with a low health status has led to a decrease in the number of people with a low life expectancy.

The decrease in the number of people with a low life expectancy has led to a decrease in the number of people with a low quality of life.

The decrease in the number of people with a low quality of life has led to a decrease in the number of people with a low standard of living.

The decrease in the number of people with a low standard of living has led to a decrease in the number of people with a low income.

The decrease in the number of people with a low income has led to a decrease in the number of people with a low educational level.

The decrease in the number of people with a low educational level has led to a decrease in the number of people with a low life expectancy.

The decrease in the number of people with a low life expectancy has led to a decrease in the number of people with a low health status.

The decrease in the number of people with a low health status has led to a decrease in the number of people with a low life expectancy.

The decrease in the number of people with a low life expectancy has led to a decrease in the number of people with a low quality of life.

The decrease in the number of people with a low quality of life has led to a decrease in the number of people with a low standard of living.

The decrease in the number of people with a low standard of living has led to a decrease in the number of people with a low income.

The decrease in the number of people with a low income has led to a decrease in the number of people with a low educational level.

The decrease in the number of people with a low educational level has led to a decrease in the number of people with a low life expectancy.

The decrease in the number of people with a low life expectancy has led to a decrease in the number of people with a low health status.

The decrease in the number of people with a low health status has led to a decrease in the number of people with a low life expectancy.

The decrease in the number of people with a low life expectancy has led to a decrease in the number of people with a low quality of life.

The decrease in the number of people with a low quality of life has led to a decrease in the number of people with a low standard of living.
