Re: 2013/8158/P revised

Dear Tania,

In advance of commenting in detail on the revised proposals I note that unfortunately the information requested in my letters of 3rd and 24th March 2014 and more importantly judged by you on your site inspection to be necessary for the proper appraisal and which you said you would ask to be provided, has still not been supplied.

The information in question:

1. There is still no plan showing the relationship between the proposed 3rd floor extension at 27/29 with that existing at 1 Colville Place. It is therefore not possible to judge the relative alignment of the proposed extension.
Such a plan is also needed to properly assess the problem of overlooking from the 4th floor terrace.
The contextual elevation provided is very skeletal, indeed so ghostly at 3rd floor level, as to be not very helpful in judging the relationship between the proposal and existing, particularly in relation to a **listed building** (1 Colville Place).
2. There is also still no information concerning the height and profile of the separating wall between the two terraces. Given the difference in the level between the terraces a section would be helpful.

I very much hope the Council will persevere in requiring this essential information.

Best wishes, yours sincerely

Max Neufeld
