Dear Sirs

It is regrettable that the planning department is considering the change of use of the Triyoga Centre.

The Centre provides an invaluable service. As a resident of London Borough of Camden, I have relied on the Centre to help me lead a normal lifestyle, in view of the hectic urban lifestyle we live in. I have been a regular client of the Centre, and particularly when I have been unwell, for the remedies and therapies that have helped me get better and prevent further medical issues. This has the resultant effect of savings and less reliance on the under-resourced NHS.

Yours faithfully
