

To Development Management.
Camden Town Hall Extension.

Dear Sir, Madam,

Ref:2011/4390/P

As a regular user-winter and summer-of Kenwood Ladies' Pond, I write to register my strongest objections to the Water House Development.

The presumption that property developers and monied owners can dictate conditions that threaten,pollute and damage the natural and social environment must be challenged and opposed.

Millfield Lane is used by walkers,runners and cyclists; it is not a byeway for construction traffic,which would overwhelm the lane,inconvenience all users and prohibit free access.

Although there are many areas of concern,my key point centres on the impact and changes to the plant and water environment.The dramatic changes to the Lane itself and the pollution to the water courses caused by deep construction which could not be remedied by Heath Authorities nor would be by developers, are to be resisted.

I register my objection to this proposal.
