

I am writing as a neighbour, and not as a member of the DPCAAC.

My main concern is all the noise and vibration that will be caused by these two building works, if allowed. This summer we have had a basement in Croftdown Rd excavated, currently work at No 52 and we have yet to have the conversion at No 64 Croftdown Road. I am desperately trying to study at home; I have a deadline to meet. My daughter is currently staying with me to escape the noise in her flat. **Please** can there be a clause inserted not allowing loud music to be played all day by the builders, as there was at No 34 Woodsome Road?

I do have concerns regarding subsidence if there is to be excavation at No 54 Croftdown Road. Also will the solar panels be on the rear extension, which I overlook, or will they be on the rear of the main roof?

Thank you,

Eileen Willmott
