The reasons for this objection are:

We have a skylight on our 1<sup>st</sup> floor directly below the proposed planter at rear of building at no. 87 and a valley gutter that collects the rainwater from our whole building. We are concerned that the gutters will get clogged with falling material (soil and plant debris) from the proposed planter leading to flooding on all floors of our building.

When previous building work took place at number 87, 2 large steel H-beams were abandoned on our party wall (see photographs 9.0 in Design and Access Statement, 87 Charlotte Street, W1T). Will these be removed as part of these new works?

We object to the proposed revamping of the roof terrace as there would be noise and disturbance after work and at weekends, currently something not occurring.

We would be grateful if you would keep us informed of your decision.
