Dear Mr Tulloch,

I object to the planning application for number 95 South Hill Park (reference 2013/3648/P).

1. The rear extension is too big and bulky and the additional extension into the rear garden is beyond the established line of approved extensions and will create overlooking and amenity problems for the inhabitants at 93 and 97a.
2. The rear extension should have a green roof to improve amenity for upper flats at number 97 and reduce problems with surface water run-off.
3. A basement impact assessment, including ground investigation, should be undertaken in line with Camden policy.

Regards,

Andrew Fraser
