Dear Sir/Madam

Re: Flat 46, 30 Oval Road NW1 7DE

Application 2013/3485/P Proposal: Creation of roof terrace, with associated staircase and glazed balustrades to existing flat.

Originally, with other neighbours, I fought strenuously against any extension higher than was granted. To change this past planning approval in so short a time would seem to make a mockery of the planning procedures, and therefore I believe that the original decision should be upheld.

Only last year we residents in Gilbey House fought to oppose any extension in height to The Henson when another similar planning application was made.

If granted, this roof terrace would put a permanent blight on the skyline viewed from the canal, the towpath and all the residents with flats on the canal side of Gilbey House. Also, if granted, it would set a dangerous precedent to other owners of flats in The Henson to make similar applications which would be totally against all these reasons mentioned.

Also, this proposed extension would take away my view of the sky. There is little natural daylight in my north-facing flat and the main natural light source is from directly opposite around the Henson.

I consider that a planning application like this makes a mockery of the planning processes in our country. Please ask yourself and answer these questions:
WHY? ON WHAT MERITS? FOR WHOM?

I implore you to take these points into consideration very seriously when the Planning Committee considers this application.

Thank you.

Yours faithfully
