

Dear Sir/Madam

I do have concerns about the proposed development at 2 Southampton Row for the following reasons:

- the business interruption from noise and dust in the area for a long period of time
- and access issues [as already our couriers are struggling to collect and deliver in this area]
- we already have crossrail undergoing works which we believe has caused a shift in our front door plate
- they are proposing to dig 3 metres from our building foundations to underpin. We have appointed a surveyor to represent our interests but again we have concerns about the impact on the building and potential interruption to business through possible power failures etc

Regards

Rachel Hiscox
