To whom it concerns

I am Pippa Michaels [REDACTED] I am writing to OBJECT to the application of felling the Robinia Tree in the front garden of 106 Haverstock Hill.

I object because

1. the tree is beautiful and makes the area pretty and softens the landscape , making the street calmer and more pleasing to the eye. It is evergreen and provides shelter and leaves all year round. it enhances the area by making it feel more residential and less urban.it improves the well being of all who see it.

2. the tree reduces the noise of the street

3. the tree is home to lots of wildlife and birds

4. the tree produces lots of oxygen and nourishes the area which has a lot of traffic in it.

5. the tree has been there for a long time and part of the character of the street and this area is a conservation area.

the tree is not dangerous and is not harming the landscape.....

thank you
Pippa Michaels
