My main objection to the application 2013/1911/P is that there is no direct access to the property except through the common entrance & hallway.

It would be impossible to live in a house with men, material & equipment, rubbish & earth were moving in & out our front door.

There are seven other flats in the building.

A further reason for objection is that I live just above the proposed work in flat 4.

If the extension has a flat roof & it is accessible, people would look directly into my living room

Janos Reeves
