Comments on this application:

My main concern is potential loss of privacy in our back garden and the rear of house. The garage currently provides a screen that would be removed if demolished. Houses opposite the garage would have clear sight into our garden and first and second floor levels. It also appears that the hard standing area proposed would only have a railing where the rear wall of the garage now stands. We would be looking straight at parked cars from our first and second floor windows. There is also the issue of noise when cars come and go within such close proximity. I am aware the owners of No 3 are keen to avoid our loss of privacy and have taken great care with the rest of their renovations - I would ask that their architect ( welcome to come and view from our property ) looks at alternative ideas to find a solution that suits all parties.

Kind regards

DAVID CAMPBELL
