CULTURE & ENVIRONMENT

As you are aware Chimneys and Flues are subjected to intense heating and cooling cycles, condensation and aggressive chemical reactions caused by hot flue gases.

1) To have the planning of the extension of Flues - in our building, the Council must ensure that the work is not executed by unqualified contractors using inappropriate materials and ill-conceived methods. This may result to the damaging of our building - to the character and fabric of our building and may be dangerous. Please consider my suggestion.

Thank You.
