13th May 2013

[REDACTED]

After checking the revised plans online I object to the application of proposed plans for 4 St. Augustines Road NW1 9RN of the erection of a **five storey** building comprising of **7x3 bedroom** and **2x2 bedroom flats**.

These nine residential units would lead to a considerable loss of daylight and sunshine to my Hallway and landing area as I have stated before.

I have a large window in my hall approximately 6 ft x 4 ft that is situated on the side elevation of the property that faces the junction area of Murray St. and St. Augustines Road. This allows considerable light into my property and would make it feel dark and drab. The window covers the split level of my flat and is essential to allow natural daylight into my property which these nine residential units would totally obscure.

Once again I totally oppose these revised plans.

Regards,

Matthew Jacques
