1 INTRODUCTION

- 1.1 Vectos has been appointed by McGregor Homes Ltd, to provide traffic and transport advice for a planning application for a proposed mixed use residential and employment development at 159-161 Iverson Road, Camden.
- 1.2 The site is located to the west of West Hampstead Thameslink, between the junctions with West End Lane and Maygrove Road. The strategic location of the site is shown in **Figure 1** and the local context in **Figure 2**.
- 1.3 The site is currently occupied by a tyre sales centre, Iverson Tyres Ltd, which comprises a one-storey warehouse building, three portacabins and a forecourt. It is bound by a rail embankment to the north, Iverson Road to the south, a Network Rail signal box building to the west and a vacant plot the east. It should be noted that the plot to the east of the site was previously occupied by a garden centre and has planning permission for a residential development of 36 units.
- 1.4 The site has extant planning approval (ref: 2013/7505/P) for a development of 19 residential units (C3 Use Class) plus a light industrial unit (B1c Use Class) of 164 sqm (the 'Consented Scheme').
- 1.5 However, the Applicant now proposes a development of 23 residential units (C3 Use Class) plus a light industrial unit (B1c Use Class) of 164 sqm. On that basis, the proposed development represents a net increase of four residential units compared to the Consented Scheme.
- 1.6 This Transport Statement (TS) has been prepared in accordance with the Department for Transport's (DfT) 'Guidance on Transport Assessment' and following pre-application advice from officers at the London Borough of Camden (LBC) regarding the scope of supporting documentation to support a planning application. The remainder of this report is structured as follows:
- Section 2 – Describes the site's location and accessibility;
 - Section 3 – Describes the proposed development;
 - Section 4 – Considers the relevant national, regional and local policy background;
 - Section 5 – Considers the impact of the development; and

- Section 6 – Provides a summary and conclusion to the report.

2 EXISTING SITUATION

Introduction

- 2.1 The application site is situated at 159-161 Iverson Road, which forms the site's southern boundary, between the junctions with West End Lane and Maygrove Road.
- 2.2 To the north of the site are the railway embankment and the existing West Hampstead Thameslink Rail Station. To the east of the site there is a currently vacant plot of land which was previously occupied by a garden centre. This has planning permission (ref2012/0099/P) for a 36 unit residential development.
- 2.3 To the south of the site and Iverson Road there are predominantly residential land uses consisting of a mixture of flats and terraced housing. To the west of the site is a 3 – 4 storey Network Rail signal box building. The access road for this building denotes the western boundary of the application site.
- 2.4 As noted previously, the site is currently occupied by Iverson Tyres Ltd which comprises a one storey warehouse building, three portacabins and a forecourt. Vehicular and pedestrian access is both currently from Iverson Road.
- 2.5 A plan indicating the site's location in a local context is presented at **Figure 2**.

Local Highway Network

- 2.6 **Figure 1** shows the strategic location of the site, in the context of the wider highway network.
- 2.7 As noted previously, the site is situated on Iverson Road, a local access road running between West End Lane and the A5 Kilburn High Road. This is a single carriageway, two-lane road which forms the southern boundary of the site and provides access to a number of residential streets in the surrounding area.
- 2.8 West End Lane is a short north-south route through West Hampstead which provides access to the A41 Finchley Road to the north and Kilburn High Road to the south. In turn, the A41 Finchley Road runs south to Oxford Street through St Johns Wood and Marylebone; and provides a strategic route through north-west London to the A1 and M1 at junction 2. The A1

and M1 provide strategic routes out of London to destinations including, Luton, Stevenage, Milton Keynes, Peterborough and Northampton.

- 2.9 The A5 Kilburn High Road runs south to Marble Arch through Kilburn and Maida Vale and north to the M1 at junction 4.

Parking

- 2.10 The site is located within Controlled Parking Zone (CPZ) Q, which restricts parking to resident permit holders only from Monday to Friday between 08:30 and 18:30. Outside of these hours parking is unrestricted. On-street resident parking bays are present on both sides of the carriageway, along the majority of the length of Iverson Road.
- 2.11 Although the majority of available parking is restricted to residents, there are three pay & display and two 'car club-only' bays located opposite the Thameslink Rail Station. The pay & display bays are subject to a maximum stay of two hours with restrictions applying from Monday to Friday between 08:30 and 18:30.
- 2.12 It should also be noted that a small number of designated disabled bays are located on-street along Iverson Road.

Accessibility by Walking and Cycling

Walking

- 2.13 Footways are provided along both sides of Iverson Road and are considered to be of sufficient width, with adequate levels of street-lighting provided. Three dedicated pedestrian crossings are located along Iverson Road, including two zebra crossings. In addition, signalised crossings are located at either end of Iverson Road at the junctions with West End Lane and Kilburn High Road. All crossings provide tactile information and dropped kerbs, which enable safe movement by pedestrians with mobility and sensory impairments.
- 2.14 Pedestrian facilities along both West End Lane and Kilburn High Road are good, due to the high volume of pedestrians and the nature of the carriageways.
- 2.15 **Figure 3** shows a number of local facilities, accessible within an approximate 10 minute walking distance. It can be observed from Figure 3 that food shops, medical facilities, a bank and a post office are all located within the vicinity of the site.

Cycling

- 2.16 A small number of cycling facilities are provided within the vicinity of the site. Advanced Stop Lines (ASLs) are provided on Iverson Road at the junction with Kilburn High Road and road markings are present along Kilburn High Road identifying the presence of cyclists.
- 2.17 It should be noted that designated cycle lanes are not provided, however, Kilburn High Road and West End Lane to the north of Iverson Road are identified by TfL as “routes signed for cyclists on a mixture of quieter and busy roads.” In addition, a number of local roads around the site are identified as “quieter roads that have been recommended by other cyclists.”

Accessibility by Public Transport

- 2.18 The site has a PTAL of 5 (‘Very Good’) and is extremely well-served by a variety of public transport networks, including bus, rail, underground and overground. The PTAL detail and summary reports are presented at **Appendix A** for information. It should be noted that this PTAL calculation does not include the new entrance to West Hampstead Thameslink Station. Whilst this results in an improvement in the accessibility index of the site, the PTAL will remain at 5.
- 2.19 A plan indicating the location of the nearest public transport facilities is shown in **Figure 4**.

Bus

- 2.20 The nearest bus stops to the site are located approximately 260 metres from the site access and are located on West End Lane.
- 2.21 The location of local bus stops can be viewed at **Figure 4** and a summary of the bus routes serving these stops is presented in **Table 2.1**.
- 2.22 It should be noted that average frequency refers to daytime services only, with the exception of night buses, where frequency is given in minutes.

Table 2.1 – Local Bus Routes

Stop	Service	Route	Average Weekday Frequency	Average Saturday Frequency	Average Sunday Frequency
1 – 4	139	West Hampstead – Oxford Circus - Waterloo	6 – 8	8	12 – 15
	328	Golders Green – Kensington – Chelsea	6 – 7	6 – 7	10
	C11	Bent Cross – Swiss Cottage – Archway	8	8	12 – 20
5 – 6	16	Cricklewood – Kilburn – Victoria	6	6 – 10	10
	32	Edgware – Cricklewood – Kilburn	8 – 10	8 – 12	12 – 15
	189	Brent Cross – Cricklewood – Oxford Circus	6 – 8	8 – 12	12
	316	Cricklewood – Queens Park – White City	8	8 – 12	12
	332	Brent Park – Kilburn – Paddington	10	10 – 12	12 – 15
	632	Kilburn Park – Cricklewood – Grahame Park*	07:48, 15:49	-	-
	N16	Edgware – Cricklewood – Marble Arch – Victoria	20	20	20

*School service

- 2.23 It can be observed from Table 2.1 that the site is served by a number of frequent bus services, which provide access to several key destinations including Waterloo, Victoria and Paddington.

Underground

- 2.24 West Hampstead underground station is located approximately 350 metres from the site access, on West End Lane, and is served by the Jubilee Line. The station is in Zone 2 of London’s transport zones.
- 2.25 Services run between Stratford and Stanmore and key destinations include Westminster, London Waterloo, London Bridge, Canary Wharf and Greenwich.
- 2.26 Services run regularly throughout the day, seven days a week. A summary of the first and last trains from West Hampstead is presented in **Table 2.2**.

Table 2.2 – West Hampstead Underground Services

Destination	Monday – Saturday		Sunday	
	First Train	Last Train	First Train	Last Train
Stanmore	05:52	00:48	07:45	00:12
Stratford	05:14	00:33	07:15	23:48

Rail

- 2.27 West Hampstead Overground Station is located approximately 270 metres from the site, on West End Lane. The station is served by the Richmond/ Clapham Junction – Stratford line. A summary of the first and last trains from West Hampstead and a summary of average frequency are presented in **Table 2.3** and **Table 2.4** respectively.
- 2.28 A route map of the Richmond/ Clapham Junction – Stratford Line is presented at **Appendix B**.

Table 2.3 – West Hampstead Overground Services (First & Last Trains)

Destination	Monday – Friday		Saturday		Sunday	
	First Train	Last Train	First Train	Last Train	First Train	Last Train
Stratford	06:08	23:33	06:07	23:28	09:10	23:26
Richmond	06:18	00:16	06:17	00:16	09:31	23:36

Table 2.4 – West Hampstead Overground Services (Frequency)

Destination	Average Frequency Monday – Friday	Average Frequency Saturday	Average Frequency Sunday
Stratford	5 – 10	10	8 – 20
Richmond	6 – 10	10	10 – 15

- 2.29 West Hampstead Thameslink station is located on Iverson Road, approximately 130 metres east of the site. The station is on the Midland Main Line and is served by First Capital Connect trains as part of the Thameslink Line service between Kentish Town and Cricklewood. Services operate over the 24 hour period from Monday to Saturday, with a reduced service operating on Sundays.
- 2.30 A summary of average frequency for Thameslink services is presented at **Table 2.5**.

Table 2.5 – West Hampstead Thameslink Services

Destination	Average Frequency Monday – Friday	Average Frequency Saturday	Average Frequency Sunday
Kentish Town	12 – 20	15	30
Cricklewood	10 – 20	12 – 18	30

Summary

- 2.31 A review of the site’s accessibility indicates that it is situated within a very accessible location, which is reflected by the high PTAL (5- ‘Very Good’) of the site. There are a number of bus, overground, underground and rail routes which combine to provide a variety of high frequency service to a number of destinations. Pedestrian provision surrounding the site is good, providing a good level of accessibility to these public transport interchanges and a range of local facilities.

3 DEVELOPMENT PROPOSALS

3.1 This section of the report describes the development proposals, including parking and servicing proposals.

Proposed Development

3.2 The proposals include the following:

- the demolition of the existing tyre sales centre, Iverson Tyres Ltd;
- the erection of 23 residential units, five of which will be affordable; and
- a 164 sqm B1c employment use at the ground floor.

3.3 The 23 residential units, ranging between 1 and 3 bedrooms, will be located over seven floors, including the ground floor, with five affordable units, two of which will be wheelchair accessible and the employment space located at the ground level. The architect's scheme layout can be viewed at **Appendix C**.

3.4 As part of the development, the existing vehicular access to the site, which is provided via a crossover with Iverson Road, will be closed and the footway re-instated. As such there will be no vehicular access to the application site other than for cycles.

Parking

Car Parking Provision

3.5 The scheme is proposed to be car-free, in that no car parking spaces will be provided on-site for residents or employees of the B1c unit. The provision of a car-free development is supported by LBC policies (as set out in Section 4 below), and has been confirmed as acceptable during pre-application discussions with LBC officers.

3.6 It is recognised that disabled parking should be provided at a ratio of 1 space per wheelchair accessible unit. This disabled parking can be satisfactorily provided on-street adjacent to the application site. This is consistent with the consented development for 36 residential units on the adjacent vacant plot.

- 3.7 As noted previously in Section 2, a small number of pay & display bays are located on-street at the east of Iverson Road, however these are restricted to a maximum stay of 2 hours. The remainder of bays are restricted to permit holders only during the hours defined by the CPZ.
- 3.8 It should be noted that new residents at the proposed development will not be granted resident parking permits, in line with policy DP18 of the Camden Development Policies.

Cycle Parking Provision

- 3.9 Cycle parking for the development will be provided in accordance with both Camden local standards, as set out within policy DP18 of the Camden Development Policies, and TfL Cycle Parking Standards, which are contained within the London Plan.
- 3.10 With regards to the B1c employment unit, cycle parking standards only apply from a threshold of 500sqm upwards and therefore there is no requirement to provide cycle parking for this element of the development.
- 3.11 For residential units, the London Plan indicates that 1 cycle parking space is required for all one / two bedroom dwellings with 2 spaces required for all dwellings with three or more bedrooms. 1 visitor parking space per 40 residential units is also required. A total of 31 cycle parking spaces will therefore be provided within a secure cycle store at ground floor level, in accordance with London Plan standards.

Servicing

- 3.12 It has been confirmed with LBC that servicing of the proposed B1c employment unit, can be carried out on-street. Given the size of unit proposed, it is considered that the number of service vehicle movements will be minimal, and will be undertaken by transit type vans.
- 3.13 The closure of the existing vehicular access to the site will provide sufficient frontage to allow this servicing to be undertaken without detriment to the flow of existing vehicles on Iverson Road, including those associated with other sites adjacent sites which benefit from vehicular access points.
- 3.14 It is also envisaged that refuse and recycling collections for both the employment and residential uses will also be carried out on-street.

Impact on Public Highway Network

- 3.15 Following submission of the consented scheme, LBC officers requested further information regarding the potential impact of the development proposal on the operation of the public highway network, and in particular the vehicular access to the adjacent property to the west of the site. The proposed development does not require any works within the existing public highway and as such, visibility at this access will not be impacted.
- 3.16 A visibility splay drawing has been produced for this adjacent access which demonstrates that a visibility splay of 2.4m x 43m, appropriate for a speed limit of 30mph, can be provided within the existing public highway. This drawing is presented as **Appendix D**.

4 POLICY CONTEXT

4.1 This section of the report provides a summary of relevant policy guidance, both at a national and local level.

National Policy

4.2 The National Planning Policy Framework (NPPF) set out the Government's planning policies for England and how these are expected to be applied.

4.3 One of the 12 core land-use principles within the NPPF includes:

"[to] actively manage patterns of growth to make the fullest possible use of public transport, walking and cycling, and focus significant development in locations which are or can be made sustainable."

4.4 Section 4 of the NPPF deals with 'Promoting sustainable transport.' Paragraph 29 states that:

"The transport system needs to be balanced in favour of sustainable transport modes, giving people a real choice about how they travel."

4.5 Paragraph 30 goes on to say that *"In preparing Local Plans, local planning authorities should therefore support a pattern of development which, where reasonable to do so, facilitates the use of sustainable modes of transport."*

4.6 Consideration of the accessibility of the site by sustainable travel modes, including public transport, walk and cycle is set out within **Section 2** of this report, where it is shown that the site benefits from an excellent level of public transport services.

4.7 Paragraph 32 sets out the transport issues which should be addressed within Development Plans and decisions. These are:

- "The opportunities for sustainable transport modes have been taken up depending on the nature and location of the site, to reduce the need for major transport infrastructure;
- Safe and suitable access to the site can be achieved for all people; and

- Improvements can be undertaken within the transport network that cost effectively limit the significant impacts of the development.

4.8 Paragraph 32 also states:

“Development should only be prevented or refused on transport grounds where the residual cumulative impacts of development are severe.”

4.9 **Section 5** considers the impact of the development proposals on various modes of travel demonstrating how the additional trips generated will have no impact.

Regional Policy

London Plan

4.10 The London Plan, Spatial Development Strategy for Greater London (July 2011) sets out an integrated economic, environmental, transport and social framework for the development of London over the next 20-25 years.

4.11 One of the Mayor’s six objectives for London is:

“A city where it is easy, safe and convenient for everyone to access jobs, opportunities and facilities with an efficient and effective transport system which actively encourages more walking and cycling, makes better use of the Thames and supports delivery of all the objectives of this Plan.”

4.12 The transport aspects of the London Plan, relevant to the proposed development, are discussed in the following paragraphs.

4.13 Policy 6.1 establishes the Mayor’s strategic approach to transport. Of relevance it states that the mayor will encourage the closer integration of transport and development by:

“a. encouraging patterns and nodes of development that reduce the need to travel, especially by car;

b. seeking to improve the capacity and accessibility of public transport, walking and cycling;

- g. supporting measures that encourage shifts to more sustainable modes and appropriate demand management; and*
- i. promoting walking by ensuring an improved urban realm.”*

4.14 In relation to walking, Policy 6.10 states that in respect of planning decisions:

“Development proposals should ensure high quality pedestrian environments and emphasis the quality of the pedestrian and street space.”

Local Policy

4.15 Local policy is contained within the Camden Local Development Framework (LDF) which was adopted in November 2010 and superseded the 2006 Camden Unitary Development Plan. The LDF documents consist of the London Borough of Camden Core Strategy 2010-2025 and Development Policies.

Core Strategy

- 4.16 The Camden Core Strategy 2010-2025 is part of the Camden Local Development Framework, which sets out the Council’s planning strategy and policies.
- 4.17 Policy CS3 states that the Council will promote appropriate development in the “highly accessible area” of the town centre of West Hampstead. It considers the area to be a suitable location for the provision of homes, and particularly useful for land uses that are likely to significantly increase the demand for travel, due to its accessible location.
- 4.18 Policy CS11 states that the Council will minimise provision for private parking in new developments, through car free developments in the borough’s most accessible locations. It requires developments to recognise Camden’s road hierarchy and ensure the development does not harm the management of the road network.

Development Policies

4.19 Policy DP16 looks at the transport implications of development, and expects development proposals to ensure that there are sufficient walking, cycling and public transport links. Developers are expected to assess and address the need for:

“a) movements to, from and within the site, including links to existing transport networks. The Council will expect proposals to make appropriate connections to highways and street spaces, in accordance with Camden's road hierarchy, and to public transport networks;

b) additional transport capacity off-site (such as improved infrastructure and services) where existing or committed capacity cannot meet the additional need generated by the development. Where appropriate, the Council will expect proposals to provide information to indicate the likely impacts of the development and the steps that will be taken to mitigate those impacts, for example using transport assessments and travel plans;

4.20 Policy DP17 relates to the development's requirement to provide suitable walking, cycling and public transport facilities, and also provision for interchanging between different modes of transport. This provision may include:

“a) convenient, safe and well-signalled routes including footways and cycleways designed to appropriate widths;

b) other features associated with pedestrian and cycling access to the development, where needed, for example seating for pedestrians, signage and high quality cycle parking;

c) safe road crossings where needed;

d) bus stops, shelters, passenger seating and waiting areas, signage and timetable information”

4.21 Policy DP17 states that the Council will resist development that would be dependent on travel by private motor vehicles.

4.22 Policy DP18 relating to car parking standards states that development should comply with the Council's parking standards, and the area of West Hampstead is expected to be 'car free'. The Council will:

“a) limit on-site car parking to:

- spaces designated for disabled people,*
- any operational or servicing needs*

b) not issue on-street parking permits

c) use a legal agreement to ensure that future occupants are aware they are not entitled to on-street parking permits”

4.23 With regard to cycle parking, Policy DP18 requires developments to meet the Council’s minimum standards for cycle parking (details of which are set out within **Section 3** of this report).

5 DEVELOPMENT IMPACT

5.1 This section of the report assesses the impact of the proposed development, in terms of net trip generation between the existing and proposed land uses.

Existing Use

5.2 As noted previously, the site is currently occupied by a tyre sales centre, Iverson Tyres Ltd. In order to assess the volume of trips generated by the existing use, the TRICS database has been examined and the trip rates for a number of similar sites extracted. No suitable comparison sites were identified within the TRAVL database.

5.3 The following parameters were used within the TRICS site selection process:

- Land use category 'Vehicle Services';
- Sub Land use category 'Motorist Centre (Fast Fit)';
- Greater London sites only
- Surveys from 01/01/2000 onwards
- Weekday surveys only

5.4 TRICS defines this land use as "garages which fit tyres, exhausts and brakes to vehicles on an 'as you wait' basis." It does not include sites where the sale of vehicles takes place.

5.5 It should be noted that the sites selected within TRICS do not provide full multi-modal data, however the nature of the current use means that trips are likely to be undertaken predominantly by car, with only a small number of employee related trips being undertaken by non-car modes of travel.

5.6 The results of the TRICS assessment are presented below in **Table 5.1** and the TRICS output at **Appendix E**.

Table 5.1 – TRICS Assessment- Vehicle Trips (Tyre Sales Unit)

	AM Peak (08:00 – 09:00)		PM Peak (17:00 – 18:00)		Daily Trips		
	Arr	Dep	Arr	Dep	Arr	Dep	Total
Trip Rate per Hectare	54.90	21.57	31.37	43.14	575.91	563.59	1139.50
Vehicles	5	2	3	4	52	51	104

Proposed Land Use

Residential

5.7 In order to determine the net change in trip generation between the existing and proposed land uses, trip rates have been extracted from the TRAVL database for the residential land use at the site. The following parameters were used in the site selection process:

- C3 Residential land use
- Greater London sites only
- Car-free developments
- PTAL 3 – 6

5.8 The trip rates derived from the TRAVL assessment for vehicular modes are presented below in **Tables 5.2 – 5.4 below**, whilst the TRAVL output is contained within **Appendix F**.

Table 5.2 – TRAVL Assessment- All Modes (Residential Use)

	AM Peak (08:00 – 09:00)		PM Peak (17:00 – 18:00)		Daily Trips		
	Arr	Dep	Arr	Dep	Arr	Dep	Total
Trip Rate	0.200	1.200	0.831	0.569	5.999	5.866	11.865
Trips	5	28	19	13	138	135	273

Table 5.3 – TRAVL Assessment- Car Driver (Residential Use)

	AM Peak (08:00 – 09:00)		PM Peak (17:00 – 18:00)		Daily Trips		
	Arr	Dep	Arr	Dep	Arr	Dep	Total
Trip Rate	0.015	0.031	0.031	0.015	0.292	0.261	0.554
Trips	0	1	1	0	7	6	13

Table 5.4 – TRAVL Assessment- Pedal Cycle (Residential Use)

	AM Peak (08:00 – 09:00)		PM Peak (17:00 – 18:00)		Daily Trips		
	Arr	Dep	Arr	Dep	Arr	Dep	Total
Trip Rate	0.015	0.031	0.000	0.000	0.154	0.215	0.369
Trips	0	1	0	0	4	5	8

5.9 The TRAVL surveys do not provide a full breakdown of trips by public transport and therefore in order to calculate the number of trips generated across all non-vehicle modes, 2011

Census journey to work data has been used to provide an estimated mode share. The mode share data is presented below in **Table 5.5**

5.10 It is noted that journeys will be undertaken in association with purposes other than employment, however this is considered to be the most appropriate methodology and data for determining trips by non-vehicular modes.

Table 5.5 – 2011 Census Method of Travel to Work- Non-Vehicular Trips

Mode	Mode Share (%)
Underground	64%
Train	16%
Bus	12%
Walk	8%
Total Non-Vehicular Trips	100%

5.11 Using this Census data, the number of non-vehicular trips has been calculated and is presented in **Table 5.6** below.

Table 5.6 – TRAVL Assessment- Non-Vehicular Modes (Residential Use)

	AM Peak (08:00 – 09:00)		PM Peak (17:00 – 18:00)		Daily Trips		
	Arr	Dep	Arr	Dep	Arr	Dep	Total
Underground	3	17	12	8	85	83	168
Train	1	4	3	2	21	21	42
Bus	0	3	2	1	15	15	31
Walk	0	2	1	1	10	10	20
Total	4	27	18	13	131	129	260

Employment (B1c)

5.12 The TRAVL and TRICS database do not contain any suitable comparison sites to allow trip generation associated with the proposed employment unit to be calculated. It is expected that due to the small size of the employment area (164 sqm GFA) and the nature of the unit as a flexible workshop/ studio space, very few trips will be generated. In addition it is expected that trips will be undertaken by non-car modes of travel due to the highly accessible nature of the site.

5.13 The only expected vehicle trips will be for servicing and refuse collection, which are proposed to take place infrequently and on-street, as discussed in Section 3 of this report.

5.14 It is therefore considered that the impact of the B1c employment unit will be negligible.

Net Trip Generation

5.15 A comparison of total daily trips (two-way) generated by the existing and proposed land uses is presented below in **Table 5.7**.

Table 5.7 – Net Trip Generation by Mode

Mode	Existing Land Use	Proposed Land Use (Residential)	Net Change (Daily Trips)
Car Driver	104	13	-91
Underground/ Light Rail	-	168	+168
Train	-	42	+42
Bus	-	31	+31
Walk	-	20	+20
Pedal Cycle	-	8	+8
TOTAL	104	281	+177

5.16 It can be observed from Table 5.7 that 177 additional trips per day are expected to be generated by the proposed development. However, all of these trips are undertaken by sustainable modes of travel, with a significant reduction in the number of vehicle trips. Therefore the impact of the proposed development on the local highway network in comparison with the existing land use is considered to be positive.

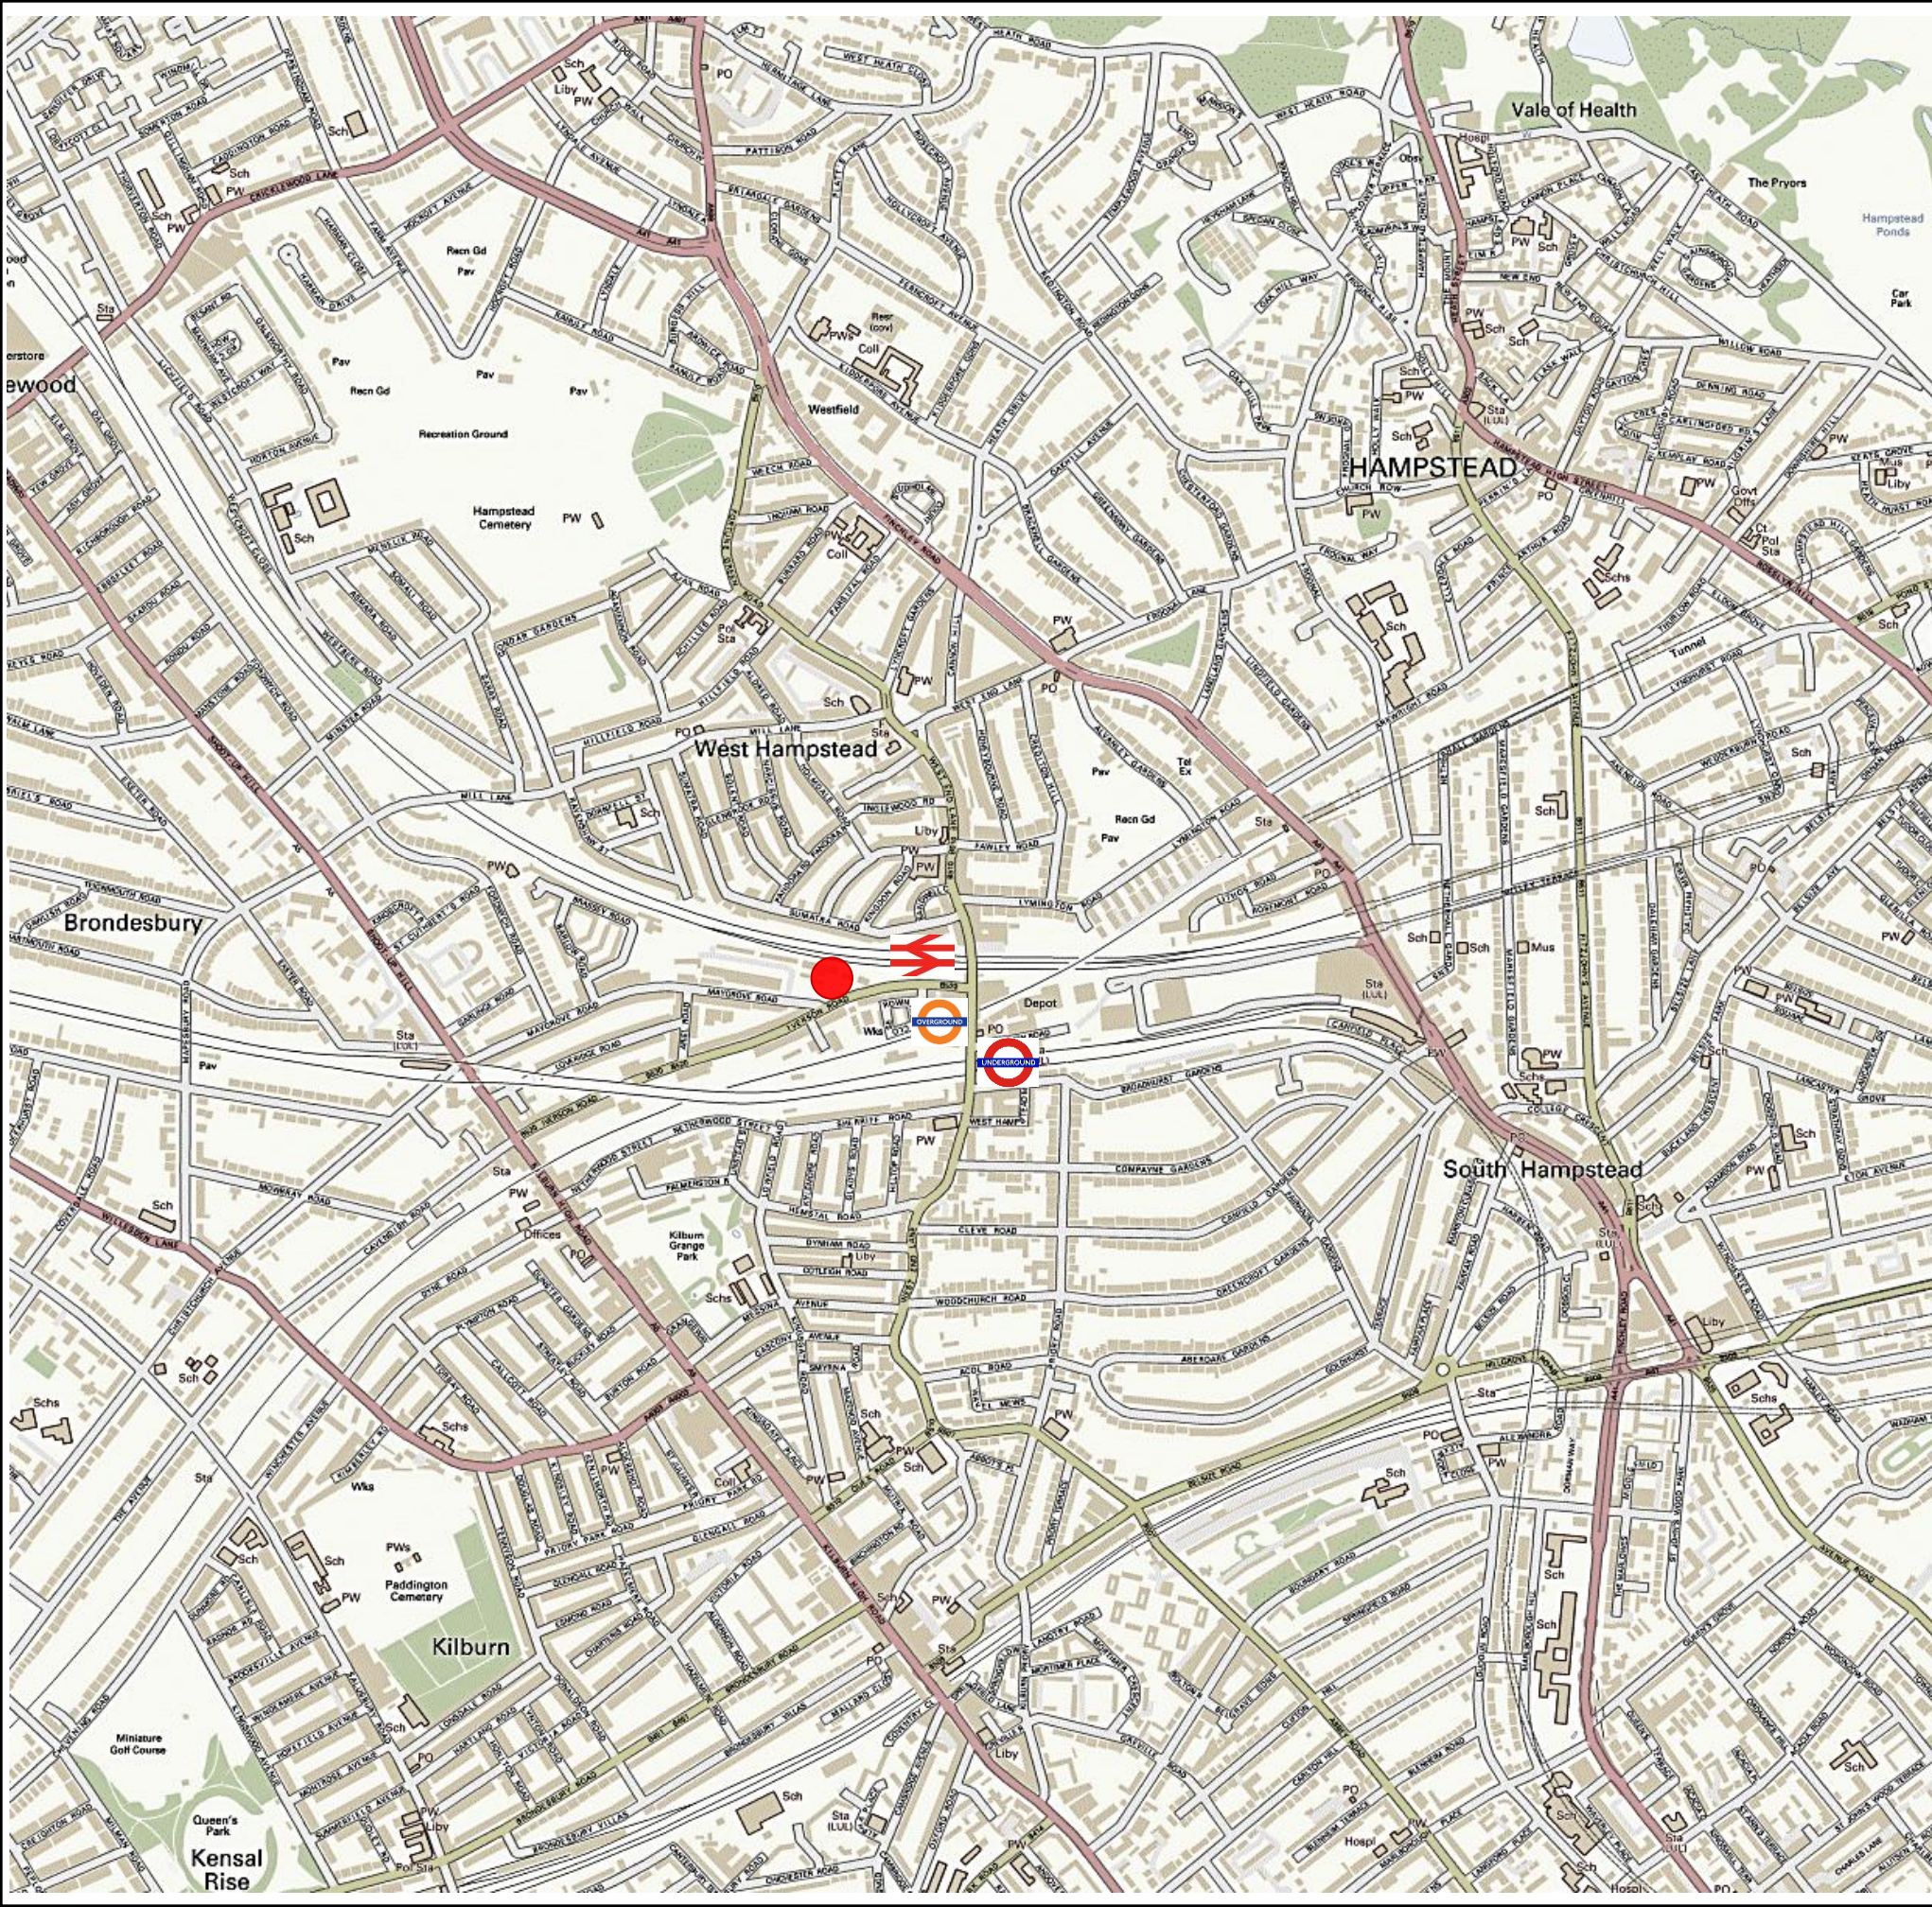

6 SUMMARY AND CONCLUSIONS

- 6.1 Vectos has been appointed by McGregor Homes Ltd, to provide traffic and transport advice in relation to a planning application for a proposed mixed use residential and employment development at 159-161 Iverson Road, Camden.
- 6.2 The site is currently occupied by a tyre sales centre, Iverson Tyres Ltd, which comprises a one-storey warehouse building, three portacabins and a forecourt.
- 6.3 The development proposals include:
- the demolition of the existing tyre sales centre, Iverson Tyres Ltd;
 - the erection of 23 residential units, five of which will be affordable; and
 - a 164 sqm B1c employment use at the ground floor.
- 6.4 The 23 residential units, ranging between 1 and 3 bedrooms, will be located over seven floors, including the ground floor, with five affordable units, two of which will be wheelchair accessible and the employment space located at the ground level.
- 6.5 As part of the development, the existing vehicular access to the site will be closed and the footway re-instated.
- 6.6 The site is situated within a highly accessible location and has a PTAL of 5. There are a number of bus, overground, underground and rail routes which combine to provide a variety of high frequency service to a number of destinations. Pedestrian provision surrounding the site is good, providing a good level of accessibility to these public transport interchanges and a range of local facilities.
- 6.7 In accordance with LBC policies, it is proposed that the development will be car-free in that no on-site car parking will be provided for either the residential or employment land use at the site and that no on-street parking permits will be permitted for new residents. Two disabled parking spaces will be provided on-street adjacent to the development site. Servicing will also be carried out on-street.
- 6.8 In total, 31 cycle parking spaces will be provided within a secure cycle store at ground floor level, in accordance with London Plan standards.

Conclusion

- 6.9 It can be concluded that the site adheres to London Plan and LBC policy and will not have a detrimental impact on the surrounding highway and public transport network.

APPENDIX E

TRICS Output

TRIP RATE CALCULATION SELECTION PARAMETERS:

Land Use : 15 - VEHICLE SERVICES
 Category : B - MOTORIST CENTRE (FAST FIT)
 VEHICLES

Selected regions and areas:

01	GREATER LONDON		
	EG	EALING	2 days
	HO	HOUNSLOW	1 days
	LW	LEWISHAM	1 days
	SK	SOUTHWARK	1 days

This section displays the number of survey days per TRICS® sub-region in the selected set

Filtering Stage 2 selection:

This data displays the chosen trip rate parameter and its selected range. Only sites that fall within the parameter range are included in the trip rate calculation.

Parameter: Gross floor area
 Actual Range: 226 to 800 (units: sqm)
 Range Selected by User: 226 to 800 (units: sqm)

Public Transport Provision:

Selection by: Include all surveys

Date Range: 01/01/00 to 13/12/12

This data displays the range of survey dates selected. Only surveys that were conducted within this date range are included in the trip rate calculation.

Selected survey days:

Monday	1 days
Thursday	3 days
Friday	1 days

This data displays the number of selected surveys by day of the week.

Selected survey types:

Manual count	5 days
Directional ATC Count	0 days

This data displays the number of manual classified surveys and the number of unclassified ATC surveys, the total adding up to the overall number of surveys in the selected set. Manual surveys are undertaken using staff, whilst ATC surveys are undertaken using machines.

Selected Locations:

Edge of Town Centre	3
Suburban Area (PPS6 Out of Centre)	1
Neighbourhood Centre (PPS6 Local Centre)	1

This data displays the number of surveys per main location category within the selected set. The main location categories consist of Free Standing, Edge of Town, Suburban Area, Neighbourhood Centre, Edge of Town Centre, Town Centre and Not Known.

Selected Location Sub Categories:

Residential Zone	1
Built-Up Zone	2
High Street	1
No Sub Category	1

This data displays the number of surveys per location sub-category within the selected set. The location sub-categories consist of Commercial Zone, Industrial Zone, Development Zone, Residential Zone, Retail Zone, Built-Up Zone, Village, Out of Town, High Street and No Sub Category.

Filtering Stage 3 selection:

Use Class:

B2 5 days

This data displays the number of surveys per Use Class classification within the selected set. The Use Classes Order 2005 has been used for this purpose, which can be found within the Library module of TRICS®.

Population within 1 mile:

10,001 to 15,000 1 days

25,001 to 50,000 3 days

101,000 or More 1 days

This data displays the number of selected surveys within stated 1-mile radii of population.

Population within 5 miles:

125,001 to 250,000 1 days

250,001 to 500,000 1 days

500,001 or More 3 days

This data displays the number of selected surveys within stated 5-mile radii of population.

Car ownership within 5 miles:

0.5 or Less 1 days

0.6 to 1.0 3 days

1.1 to 1.5 1 days

This data displays the number of selected surveys within stated ranges of average cars owned per residential dwelling, within a radius of 5-miles of selected survey sites.

Travel Plan:

No 5 days

This data displays the number of surveys within the selected set that were undertaken at sites with Travel Plans in place, and the number of surveys that were undertaken at sites without Travel Plans.

This section provides a list of all survey sites and days in the selected set. For each individual survey site, it displays a unique site reference code and site address, the selected trip rate calculation parameter and its value, the day of the week and date of each survey, and whether the survey was a manual classified count or an ATC count.

22:00 - 23:00									
23:00 - 24:00									
Total Rates:			13.416			12.829			26.245

This section displays the trip rate results based on the selected set of surveys and the selected count type (shown just above the table). It is split by three main columns, representing arrivals trips, departures trips, and total trips (arrivals plus departures). Within each of these main columns are three sub-columns. These display the number of survey days where count data is included (per time period), the average value of the selected trip rate calculation parameter (per time period), and the trip rate result (per time period). Total trip rates (the sum of the column) are also displayed at the foot of the table.

To obtain a trip rate, the average (mean) trip rate parameter value (TRP) is first calculated for all selected survey days that have count data available for the stated time period. The average (mean) number of arrivals, departures or totals (whichever applies) is also calculated (COUNT) for all selected survey days that have count data available for the stated time period. Then, the average count is divided by the average trip rate parameter value, and multiplied by the stated calculation factor (shown just above the table and abbreviated here as FACT). So, the method is: COUNT/TRP*FACT. Trip rates are then rounded to 3 decimal places.

Parameter summary

Trip rate parameter range selected: 226 - 800 (units: sqm)
 Survey date date range: 01/01/00 - 13/12/12
 Number of weekdays (Monday-Friday): 5
 Number of Saturdays: 0
 Number of Sundays: 0
 Surveys manually removed from selection: 0

This section displays a quick summary of some of the data filtering selections made by the TRICS® user. The trip rate calculation parameter range of all selected surveys is displayed first, followed by the range of minimum and maximum survey dates selected by the user. Then, the total number of selected weekdays and weekend days in the selected set of surveys are show. Finally, the number of survey days that have been manually removed from the selected set outside of the standard filtering procedure are displayed.

20:00 - 21:00									
21:00 - 22:00									
22:00 - 23:00									
23:00 - 24:00									
Total Rates:			0.590			0.498			1.088

This section displays the trip rate results based on the selected set of surveys and the selected count type (shown just above the table). It is split by three main columns, representing arrivals trips, departures trips, and total trips (arrivals plus departures). Within each of these main columns are three sub-columns. These display the number of survey days where count data is included (per time period), the average value of the selected trip rate calculation parameter (per time period), and the trip rate result (per time period). Total trip rates (the sum of the column) are also displayed at the foot of the table.

To obtain a trip rate, the average (mean) trip rate parameter value (TRP) is first calculated for all selected survey days that have count data available for the stated time period. The average (mean) number of arrivals, departures or totals (whichever applies) is also calculated (COUNT) for all selected survey days that have count data available for the stated time period. Then, the average count is divided by the average trip rate parameter value, and multiplied by the stated calculation factor (shown just above the table and abbreviated here as FACT). So, the method is: COUNT/TRP*FACT. Trip rates are then rounded to 3 decimal places.

Parameter summary

Trip rate parameter range selected: 226 - 800 (units: sqm)
 Survey date date range: 01/01/00 - 13/12/12
 Number of weekdays (Monday-Friday): 5
 Number of Saturdays: 0
 Number of Sundays: 0
 Surveys manually removed from selection: 0

This section displays a quick summary of some of the data filtering selections made by the TRICS® user. The trip rate calculation parameter range of all selected surveys is displayed first, followed by the range of minimum and maximum survey dates selected by the user. Then, the total number of selected weekdays and weekend days in the selected set of surveys are show. Finally, the number of survey days that have been manually removed from the selected set outside of the standard filtering procedure are displayed.
