2014/4309/P	Stephen Colchester	Flat 7 Parkview House 1 - 13 Miller Street London NW1 7DN	12/08/2014 15:52:43	OBJ	About half the residences in this proposal face inwards towards a central atrium which is covered by a roof. The cooking fumes from these residences would pose a health hazard to others. Another health hazard would also arise from smokers occupying these residences if they opened their windows to let out their smoke. In addition, the walkways around the central atrium are open to the atrium, so smokers on these walkways would present a health hazard to others.
2014/4309/P	Vivienne Colchester	Flat 7 Parkview House 1 - 13 Miller Street London NW1 7DN	12/08/2014 16:06:10	OBJ	I object to being subjected to cooking fumes and smokers smoke which will come up via the central atrium and thus present a health hazard. About half the proposed flats face the atrium with no windows to the outside of the building. The fumes and smoke will damage my health and will also dirty the glass atrium roof which will be unsightly and lead to additional maintenance costs for me.
