The sound will carry further because of their raised position and It could be intrusively noisy for us as we will have to see and hear them. The height of the wall of their back extension is ugly enough without the intrusion of people on top of it. We can all hear each other in our gardens when on our patios but at ground level it is not intrusive, the sound does not carry and is expected.</p> <p>They too can have a garden level patio . So I object to this plan on the grounds of lack of privacy and potential noise disturbance.</p>
