

## Photographic Schedule

Position of new window at fourth floor level in flank wall, which overlooks the roof of neighbouring property

Position of new window at fourth floor level in flank wall, which overlooks the roof of neighbouring property

New window in flank wall at fourth floor level, will overlook neighbouring roof

#### THE PROPOSAL

The proposal is to install an 1800 wide x 1200 high timber framed window to the fourth floor flat of the flank wall at No2 Holford Road, Camden.

Its position is above the neighbouring property's roof line, with the location being such as to gain the benefit of the views across London from this new window.

The window will be of timber construction and painted white to match the existing of the property. When installed the brick bonding will be maintained with all external face-work pointed to match existing.

Its high position will mean there will be no intrusion with sight lines to the neighbouring property at No1 Holford Road, Camden.
