6. Non-Material Amendment(s) Sought

*Please describe the non-material amendment(s) you are seeking to make:

Main transverse members:
In the stage D report these primary fins were shown to be glass and GRP-composite box-beam members, with stainless steel profiles attached to form the gutters [see drg. -08006]. Further research indicated that the composite action of the glass and GRP had not been sufficiently proven and the box section was likely to degrade in appearance quite rapidly as dirt accumulated in the box. Hence a decision was taken to use a wholly laminated glass structural member. The appearance is substantially unchanged, as the member is entirely transparent glass, with the same stainless steel edging profiles to form the gutters and internal edging strips. [See drawing SLE-N105-8742-STR-D-SEC-1-00202, -DET-1-00207 and -DET-1-00212.]
Secondary longitudinal glass beams
The secondary support system referred to in the "Design and Access Statement" section 2.3.4 has been amended from a 400 mm deep glass beam to a 200 mm deep glass beam. This provides a less obtrusive appearance and the detailing of the connections to the primary fins were aesthetically more pleasing. [See drawing SLE-N105-8742-STR-D-SKE-1-00262.]
