

NOTES:

- Coordinates given to centre of lighting units / columns.
- All recessed lighting within concrete flag paving to be aligned equally and neatly with paving coursing. Lighting units to be positioned so as to minimise cutting of paving units. Light units have been positioned so as to be spaced with 400 x 400 mm paving grid. Final position of units can be adjusted on site so that the fit neatly with paving coursing.
- All EX13 recessed lighting units to face of RC seating walls to be positioned at a consistent datum. Top of lighting units to be 100mm below top of concrete (not 100mm below top of timber seating).
- MUC = MUGA Lighting Column. - Coordinates given to centre of column. RC footing to all light columns to engineers (BG details). All column footings located in soft landscape to be positioned below soft landscape.
- Top of all light column heights to be at a consistent datum / level.
- All footings to MUGA and column lighting to be coordinated with below ground drainage services including ground source heat pile service trench. Any clashes to be checked and confirmed with design team.
