

- NOTES:
1. Coordinates given to centre of lighting units / columns.
 2. All recessed lighting with concrete flag paving to be aligned equally and neatly with paving coursing. Lighting units to be positioned so as to minimise cutting of paving units. Light units have been positioned so as to be spaced with 400 x 400 mm paving grid. Final position of units can be adjusted on site so that the fit neatly with paving coursing.
 3. All EXT13 recessed lighting units to be placed on side of RC seating walls to be positioned at a consistent datum. Top of lighting units to be 100mm below top of concrete (not 100mm below top of timber seating).
 4. MLC = MUGA Lighting Column. - Coordinates given to centre of column. RC footing to all light columns to engineers (BGC details). All column footings located in soft landscape to be positioned below soft landscape.
 5. Top of all light column heights to be at a consistent datum / level.
 6. All footings to MUGA and column lighting to be coordinated with below ground drainage, services including ground source heat pile service trench. Any dashes to be checked and confirmed with design team.

Setting Out of lighting units to
entrance portal to Architects details

Uplighters spaced at centres 6
meters

Uplighters to be positioned in soft
landscaping behind low seating wall.

For Setting out of Timeline lighting refer also to
drawing SCOS_SK_1032
